

Amendment to the Specification:

Please amend the paragraph beginning on page 5, line 12 as follows:

As suggested in FIG. 3, fiberglass insulation blanket 40 is passed through interval cutter 42 to cut blanket 40 along a cut line 12 to form two side-by-side strips 21, 22 separated by a first series of intermittent gaps 39 to form a frangible plane 12 extending along cut line 12. In the illustrated embodiment, interval cutter ~~[[32]]~~ 42 also cuts blanket 40 along cut lines 14 and 16 to provide (1) a second series of intermittent gaps 39 separating side-by-side strips 22, 23 to form a frangible plane 14 extending along cut line 14 and (2) a third series of intermittent gaps 39 separating side-by-side strips 23, 24 to form a frangible plane 16 extending along cut line 16.
